

LevelNet-Social Cyber-Protection Network Providing Unseen before Threat Hit Rates Focused on Preventive Protection

LevelNet integrates virtually all existing antivirus technologies into one simple, user-friendly application. This distributed system enables participants to share threat data globally and in real time, allowing for the entire system to become much smarter, much faster, than any single security cyber-security provider can today

LevelNet Ecosystem

- Technology integrating a fragmented market
- Creating a new business model for cyber-security products
- Independence from a specific security service provider
- Aggregating threat information
- Center for Monitoring Threats Identified at Endpoints

This diagram explains the main ideas of the forthcoming sale of LevelNet tokens and the relationship with the market strategy for combining a fragmented market
